Tran Pham Gia Thinh

Full Stack Developer

0962450187 trphgiathinh@gmail.com https://thinhtran1505.vercel.app Binh Chanh, Ho Chi Minh

OVERVIEW

Final-year Software Engineering student with solid hands-on experience in **full-stack web development**, gained through academic projects, internships, and self-driven learning. Skilled in building scalable web applications with modern frameworks and databases, with a strong understanding of software engineering principles, asynchronous programming, and API integration.
Recognized for being **proactive, adaptable, and highly responsible**, with excellent teamwork and communication skills. Strong problem-solving ability and logical thinking, combined with a growth mindset and the capacity to perform effectively under pressure. A quick learner who is eager to take on new challenges, continuously improve both technical and soft skills, and contribute to high-quality, efficient solutions. Proficient in English at **Upper Intermediate (Aptis ESOL – Level B2)** level, and immediately available for full-time opportunities. Passionate about building impactful software products that improve user experiences and deliver business value. Motivated to join a collaborative team where I can contribute to real-world projects while continuing to grow as a professional software engineer.

EDUCATION

TON DUC THANG UNIVERSITY August 2021 - Septemper 2025

Software Engineering

GPA: 3.0/4

WORK EXPERIENCE

Cozwork Joint Stock Company April 2025 - June 2025

Front-End Developer Intern

- Participated in front-end development using ReactJS and Angular on real-world company projects.
- Wrote clean, maintainable code using TypeScript, ensuring strong typing and scalable structure.
- Applied common design patterns to solve development challenges and improve code readability and reusability.
- Learned and implemented Clean Architecture and CQRS pattern to structure production-level applications.
- Worked with professional Git workflows, including creating and reviewing Pull Requests in a team environment.
- Collaborated effectively with team members, improving communication and teamwork skills while working on real client-facing features.

CERTIFICATIONS

Johns Hopkins University - HTML, CSS, and Javascript for Web Developers	March 2024
IBM - Introduction to Software Engineering	May 2024
British Council - Aptis ESOL (Level B2 – Upper Intermediate)	July 2024

SKILLS

Front-end	HTML, CSS, SASS, JavaScript, TypeScript, Bootstrap, TailwindCSS, jQuery.
Back-end	NodeJS, NestJS, MongoDB, PHP, RESTful API, MySQL.
Framwork/Tools	ReactJS, Angular, ExpressJS, NextJS, Flutter.
Others	Redux, GIT, Python, Java, C.

PROJECTS

POINT OF SALE WEB APPLICATION

July 2023 - December 2023

Full Stack Developer | Team Leader

Team size: 2
GitHub: https://github.com/thinhisme1123/nodeJSfinalProject
Developed a web-based POS application to manage **sales, invoices, inventory, employees, and reporting**. Led a 2-member team in planning, coordination, and deployment on **Render** with a custom domain.
Responsibilities:

- Designed database schemas to support sales, inventory, and reporting.

Tech stack: Node.js, Express.js, MongoDB, Handlebars.js, Bootstrap, jQuery

VIDEO ON DEMAN (VOD) WEB APPLICATION

June 2024 - January 2025

Full Stack Developer | Team Leader

Team size: 2
GitHub: https://github.com/thinhisme1123/webFilmVOD
Description:
Developed a film streaming web application with features for **film search, recommendations, categorization by genre/year, watch history tracking, and favorites management**. Integrated **HLS streaming with FFmpeg** and scalable content delivery using **AWS S3 and CloudFront**.
Responsibilities:

- Built frontend with **React.js** and backend with **Node.js**, ensuring smooth user experience.
- Implemented core features: film search, recommendations, favorites, watch history, and resume playback.
- Integrated **AWS S3, CloudFront, and FFmpeg** for video storage, delivery, and HLS streaming.
- Led project planning, delegated tasks, and managed delivery schedule.
- Conducted code reviews, optimizing for performance, maintainability, and best practices.
- Deployed on **Vercel** for global accessibility.

Tech stack:

- **Frontend:** React.js, HTML, CSS, Bootstrap
- **Backend:** Node.js, REST API, MongoDB
- **Deployment:** Vercel, AWS S3, CloudFront, FFmpeg

REAL-TIME CHAT APPLICATION

July 2025 - Ongoing

Full Stack Developer

Team size: 1
GitHub: https://github.com/thinhisme1123/chatting-app
Description:
Designed and developed a **real-time messaging platform** featuring 1-on-1 and group chat, media sharing, notifications, and voice/video calls. Built with a **modern UI, scalable architecture, and strong security** to provide smooth and secure communication across devices.
Responsibilities:

- Developed responsive frontend using **React/Next.js, TypeScript, and ShadCN UI**, with light/dark mode and multilingual support.
- Implemented **real-time messaging** via **Socket.IO**, including replies, edit/delete, media sharing, and typing indicators.
- Created **user management** features: profiles, friend requests, online/offline status, and group chat creation.
- Integrated **WebRTC** for 1-on-1 voice and video calls, with full call lifecycle management.
- Added **real-time notifications** for messages, friend requests, and group activities.
- Applied **Clean Architecture** principles (Presentation, Application/UseCases, Infrastructure, Domain).
- Ensured **security and privacy** with authentication, authorization, and encrypted message storage.

Tech stack:

- **Frontend:** ReactJs, NextJs, TypeScript, ShadCN UI
- **Backend:** Node.js, Express, TypeScript, Socket.IO
- **Database:** MongoDB (Mongoose)
- **Real-time Communication:** Socket.IO, WebRTC
- **Architecture:** Clean Architecture (layered structure)
