Address

Ho Chi Minh, Viet Nam

Overview

Final-year Software Engineering student with over 1 year of hands-on experience in programming through academic projects and self-driven learning. Proficient in both front-end and back-end web application development, with strong problem-solving skills and a commitment to delivering high-quality results.*

Technical Proficiency:*

Expertise in HTML, CSS, JavaScript, including DOM manipulation and the JavaScript object model. Basic experience with ReactJS, NodeJS, PHP, MySQL, NoSQL (MongoDB), JSON, and API development. Proficient in version control using Git and API testing with Postman.

Professional Attributes:

- Strong communication skills and ability to build and maintain professional relationships.
- Eagerness to learn and continuously improve technical and soft skills.
- Thrive in dynamic and creative environments with high self-discipline and responsibility.
- Fully available for full-time work during office hours and ready to start immediately.

Soft Skills: Logical thinking, excellent teamwork, adaptability, and a proactive approach to tackling challenges.

Language Proficiency: English - Upper Intermediate.

Education

2021/08 – 2025/09

TON DUC THANG UNIVERSITY – Major: Software Engineering

- GPA: 3.0
- Performance Level: Good

Certificates

03/2024

HTML, CSS, and Javascript for Web Developers

Johns Hopkins University

05/2024

Introduction to Software Engineering

IBM

Skills

Front-End: HTML, CSS, JavaScript, Bootstrap, jQuery.

Back-End: NodeJS (Express.js), MongoDB, PHP, RESTful API, MySQL.

Frameworks/Tools: ReactJS, Flutter.

Others: GIT, Python, Java, C.

(07/2023 - 12/2023)

Client	WEB PROGRAMMING WITH NODEJS FINAL PROJECT
Descriptions	Developed a web application providing Point of Sale (POS) functionality for a retail store selling phones and accessories. The system includes features for managing sales transactions, products, employees, and generating real-time reports and statistics. Key Features: • Sales transactions and invoice generation. • Product and employee management.
Number of members	2
Position	Full Stack Developer
Responsibilities	Development: • Developed the backend with Node.js, Express.js, and MongoDB. • Built the frontend using HBS and Bootstrap. Implemented product, employee, and report management features. Team Leader: • Led the team in planning, managed project timelines, execution, and task coordination. • Conducted code reviews to maintain quality and consistency.
Technology in use	• Frontend: HTML, CSS, JavaScript, jQuery, Handlebars • Backend: NodeJS, MongoDB • Architecture & Deployment: Deployed on Render, domain purchased from Hostinger

(06/2024 - 1/2025)

Client	GRADUATION PROJECT
Descriptions	Developed a web application for streaming films using React.js for the frontend and Node.js for the backend. Integrated AWS S3 for video storage and CloudFront for global content delivery, ensuring smooth video streaming. Fetched and rendered film data dynamically from KKPhim. Key Features: • Film search, recommendations, and genre-based viewing. • Responsive design for all devices. • Video hosting with AWS S3 and streaming via CloudFront. • Efficient data handling with asynchronous fetching.
Number of members	2
Position	Full Stack Developer
Responsibilities	Development: • Developed the frontend with React.js and backend with Node.js. • Configured AWS S3 and CloudFront for video storage and delivery. • Integrated KKPhim API data, implemented search, recommendations, and genre-based film viewing. Team Leader: • Led the team, managed project timelines, and ensured timely deliverables. • Coordinated frontend and backend integration, and managed deployment with AWS S3/CloudFront. • Conducted code reviews and maintained code quality.
Technology in use	• Frontend: ReactJS, HTML, CSS, Bootstrap • Backend: NodeJS, REST API • Architecture & Deployment: Deployed on Vercel
